INTRODUCTION

After completing my software engineering studies in France and obtaining a computer science master’s degree in Canada, I am now looking for a software development or research opportunity.

SKILLS

General
Software engineering, web development, programming language research
Programming languages
Rust, C/C++, Javascript/Typescript, Java, C#, Python, PHP, Haskell, OCaml
Technologies and frameworks
Linux, Git, React, Laravel, SQL databases, Redis, HTML/SCSS, L^AT_EX

EXPERIENCE

Research assistant	Summer 2022 and April 2023
Université du Québec à Montréal	
Supervisor	Étienne M. Gagnon
Mission	Work on my thesis’ research and redaction of an academic paper
Full stack freelance developer	January to December 2019
Digisoft, Rouen, France	
Mission	Lead development, deployment and maintenance of an internal ERP software
Features	Ticketing system, real-time call and notification system, billing system, employees and clients account management system
Technologies	Typescript, PHP, React, Laravel, MySQL database, Redis, Debian and Apache servers
Software developer	April to June 2018
Alstom, Rouen, France	
Mission	Development of an internal electrical modeling software
Features	Architecture improvement, interactive data entry and modelization system, data calculation and visualization system
Technologies	C++ and Qt library
Software developer	September to October 2017
Doqboard, Rouen, France	
Mission	Various improvements to the surgery survey software
Technologies	C++ and wxWidgets library

EDUCATION

Computer Science Master’s Degree	2021-2023
Université du Québec à Montréal	
CGPA	4.23/4.3
Notable courses	Compilers, virtual machines, data structures, cybersecurity
Software Engineering Degree	2016-2021
CESI Engineering School, France	
Notable courses	Software engineering, web development, databases, operating systems, robotics, networks, data science
